### **Quick List of School Supplies**

What's the smart way to shop for school supplies? Eliminate the guesswork by getting a list from your child's teacher ahead of time or waiting until school starts to find out what's actually required. The teacher may recommend specific brands, sizes or quantities, but even if the list isn't available, you can still take advantage of back-to-school sales by sticking to the basics recommended below. And remember, you can't go wrong with tools that help kids get and stay organized.
